DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious a method of scanning a semiconductor wafer having the steps of superimposing at least partially the steps of accelerating and decelerating the relative motion between the camera and wafer until the opposite scan line is reached, and in combination with the other recited limitations of claim 1. Claims 2-13 are allowed by the virtue of dependency on the allowed claim 1.

Regarding claim 14, the prior art fails to disclose or make obvious an apparatus for scanning a semiconductor wafer along a plurality of scan lines having the control device being coupled to the scanning stage and to the camera serving to perform superimposition of accelerating and decelerating of the relative motion between the camera and the wafer until the new scan line is reached, and in combination with the other recited limitations of claim 14. Claims 15-16 are allowed by the virtue of dependency on the allowed claim 14.

Regarding claim 17, the prior art fails to disclose or make obvious an apparatus for scanning a semiconductor wafer having a means for scanning the wafer with a scanning speed in a scan line direction during relative motion between the camera and the wafer, the image field of the camera having a rectangular configuration with short side of the rectangular configuration of the image field being oriented parallel to the scan line direction, and in combination with the other recited limitations of claim 17.
